About me

Third-year student at the Faculty of Computer Science within "Alexandru Ioan Cuza" University in Iași. I thrive on community involvement and am eager to leverage my foundation in Python to build innovative technical solutions. I'm looking to bring both my coding skills and my collaborative spirit to a forward-thinking IT team. I like to take on challenges to improve my coding skills and adapt to new situations.

Education

Bachelor's Degree	2023 - present
Faculty of Computer Science, "Alexandru Ioan Cuza" University Iași	
High School	2015 - 2023
"Costache Negruzzi" National College Iași Specialization: Mathematics and Informatics, Intensive English	

Projects

- Developing a local LLM interface optimized for context-aware document parsing, leveraging vector embeddings to improve the accuracy of automated summarization for large-scale PDFs.
- Executing an UI/UX overhaul of a digital portfolio, focusing on core web vitals, mobile responsiveness, and SEO optimization to enhance professional visibility.
- Architecting a procedural 2D top-down roguelike in Unity, implementing extensible state-machine AI and randomized dungeon generation algorithms to maximize replayability and combat fluidity.
- Been implicated as a DevOps Scrum Master in a Agile team for a faculty project, where I contributed to the planning and execution of sprints. We managed the development process effectively, improving the CI/CD pipeline.

Languages

- Romanian - Native
- English - Advanced (C1)
- German - Beginner (A2)

Skills

- Python
- HTML
- C++
- Git
- Python
- Working with tight deadlines
- Responsibility
- Punctuality
- Empathy
- Active listening

Other information

- I adapt easily and quickly to new situations.
- I am flexible in approaching tasks, adjusting according to requirements and changes in the social plan.
- I think creatively about projects I'm involved in, always looking for the most efficient solutions.
